Israel

Design-oriented full-stack engineer and Frontend Tech Lead with 10+ years of experience. I lead frontend architecture and UI/UX, and I'm deep into AI: I design and build AI-native products and agent-based systems, and I work in an agentic development workflow every day — Claude Code, Cursor and MCP servers, from architecture to tests. My main language is JavaScript/TypeScript (sometimes Python, Go or PHP). I love solving real-world problems and building products people actually use; I believe great software is about how it makes people feel, not only what happens under the hood.

EXPERIENCE

Frontend Tech Lead @ Stealth-mode cybersecurity startup

Jul 2026 — Present

Building AI-native security products

I lead frontend architecture and UI/UX across a multi-product security suite, served by one shared architecture and a design system built on Tailwind, shadcn/ui and Radix. I also lead the system design of an agent-based product where AI agents analyze a system, surface errors and learn from the outcomes.

`React · TypeScript · Tailwind CSS · shadcn/ui · Radix UI · AI agents · Claude Code · Cursor · MCP`

Senior Frontend Engineer @ Intel® Tiber™ AI Cloud

Jun 2023 — Jan 2026

Building the future of AI infrastructure

Developer-facing UIs for Intel's AI cloud platform on Gaudi accelerator infrastructure — compute, metrics, logs, configuration and account operations — making AI compute accessible to developers and researchers worldwide.

`React · TypeScript · cloud platforms · AI/ML infrastructure`

Frontend Engineer @ MyHeritage

Sep 2020 — Jun 2023

Helping millions discover their family stories

Frontend solutions for the back-office and billing systems that power MyHeritage's operations — tools that make the team's work smoother and keep customers happy.

`React + Redux · PHP · AWS · GraphQL`

Full Stack Engineer @ PlanetWatchers

Apr 2018 — Jul 2020

Using satellites to help protect our planet

A geospatial analytics platform turning satellite imagery into insights for forestry, agriculture and energy — cutting-edge tech with environmental impact.

`React + Redux · Node.js (TypeScript) · Lambda · ECS · AWS Beanstalk · CircleCI`

Full Stack Engineer @ Cyren

Mar 2016 — Apr 2018

Making cybersecurity accessible

Projects from concept to completion — from design mockups to responsive interfaces to database architecture. Building security tools taught me to write robust, secure code from the ground up.

`Python · Django · REST API · JavaScript · jQuery · Backbone · SCSS · MySQL`

Full Stack Developer @ Viggo

Dec 2014 — Jan 2016

Revolutionizing the hotel guest experience

My first deep dive into CMS tools — letting hoteliers customize their guests' smart-TV experience.

`Python · Django · JavaScript · jQuery · PostgreSQL · Bootstrap`

INDEPENDENT

BIMPipe · independent product · bimpipe.com

2024 — Present

Web-first tool for MEP engineers: IFC upload, 2D/3D view, automated fixture detection, riser placement, Revit/IFC export. Shipped solo with agentic workflows.

`React · TypeScript · Three.js · web-ifc · Claude Code / MCP`

SKILLS

Frontend	React + TypeScript, Redux, Zustand, Vue + Pinia, Tailwind CSS, shadcn/ui, Radix UI, HTML/CSS, responsive design, design systems
Architecture & UX	Multi-app frontend architecture, system design, state management, UI/UX ownership, data-heavy interfaces
AI & agentic dev	AI features for agent-based products, Claude Code, Cursor, MCP servers, multi-model evaluation, prompt-driven automation
Backend & APIs	PHP, Python, Django, GraphQL, REST APIs, Node.js
Cloud & infra	AWS, serverless, CI/CD, Kubernetes, deployment automation
Databases	MySQL, PostgreSQL, data modeling
Product & team	UX principles, user-centered design, agile, mentoring, code reviews, cross-functional teamwork

EDUCATION

Advanced JavaScript courses — Frontend Masters (2020 – present)

Pre-Engineering, Software Engineering — Hadassah College of Technology, Jerusalem (2008 – 2010)

Linguistics & Journalism — Penza State Pedagogical University, Penza (2000 – 2003)

BEYOND THE CODE

Mentor @ Django Girls — empowering women in tech, one workshop at a time: HTML, CSS and web fundamentals up to a first Django app.

Always excited to chat about new opportunities or just talk shop about the latest in tech. Let's build something amazing together.
